January 8, 2014

To Prospective DreamSeat Buyers,

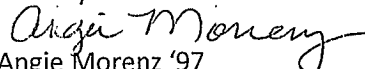

Blackburn College in Carlinville, Illinois decided that it was time to upgrade the gymnasium facility. The institution determined that the lobby needed to be more conducive to host prospective student-athletes and their families since there wasn't otherwise a conference space. The Athletic Staff determined that the look of the space should be a "clubhouse" feel, and that we needed to proudly display our new logo where possible.

One of the coaches found the DreamSeat information and the furniture was the exact look the staff had intended. When DreamSeat was contacted Matthew Sobel was able to provide the information necessary to make a decision. He was able to provide a mock-up of the all the furniture options with our logo on it, so an informed decision could be made. Matthew was quick to answer any questions and provide any additional information when needed. The process to get the furniture was rather easy, once the institution determined this was the best option for furniture it was a matter of approving artwork for the pieces ordered, since the company already had the school's logo, the artwork was sent within days.

The furniture arrived just a few weeks later, and it was even better than anyone on Blackburn's staff could have imagined. Not only is the furniture exactly the look we were going for, it is amazingly comfortable as well. The gym lobby prior to getting the new furniture was extremely underutilized, now you can find people stopping to talk, we've hosted a number of recruits and their families already, and people are impressed by what they see and feel.

Overall, from initial contact to getting the product on site, the experience with DreamSeat was professional and efficient. As the point of contact for the campus and in charge of purchasing the furniture, I would highly recommend this company and the products they sell to anyone looking to upgrade a space in, or on, a college campus.

Thank you!
