

Grid Rise

Why are your best fans sitting in the worst, least comfortable, and hardest to access folding chairs? Bring the comfort of your flip up arena or stadium seating down to courtside or the field! The Grid Rise utilizes a patented system that allows venues to implement tip up seats on the floor of the arena while allowing for changes in seat elevation to produce better sightlines. The Grid Rise can provide multiple rows of floor seats at varying seat heights WITHOUT utilizing any platforms; a space, cost, and install time savings. Utilizing flip up seats on the floor also allows for wider egress pathways and potential tighter row spacing, tighter row spacing can potentially mean more seats, which means more revenue. All of this without sacrificing comfort, safety, and increasing the fan experience and enjoyment.

Features

- Available with our Ovation, Luxx, or Luxx Plus model seats
- Seats are MUCH more comfortable than standard folding chairs
- Seats come in gangs of three for ease of install and transport but can also come in two and one seat configurations
- Aluminum sleds are fully customizable from 30" tread to 36" tread depending on chair model chosen
- Footrest provided for rises of 2"-6", drop on platforms available for rises above 6" (no understructure required, sleds provide the support structure)
- Available in seat spacing from 18"-22" OC
- Tip up armrests, armrests with cup holder, rear mount cup holders all available and permanently attached to the seats
- Magnetic seat numbers and drop in aisle letters increase visual appeal and make it easier for patrons to find their seats
- Stacking and wheeled storage carts provide a compact footprint when stored
- No more laying out different height platforms to raise your floor seats
- Faster install and strike time
- Safer install as all chairs lock together left to right and into the sleds, no folding chairs moving around on top of your decking

Ovation Seat

Luxx Seat

Luxx Plus

Grid Rise vs. Folding Chairs

Compact Storage

Fork-liftable and with transport wheels. Stacks up to 4 high.

Individually stored.

Safer Installation

All Chairs locked into sled base.

Loose and can move forward to back.

Quicker Installation

No need for added platforms, chairs install in gangs of 3.

Folding Chairs lay out one at a time and many need platforms.

Magnetic Aisle Letters and Seat Numbers

Permanent look, temporary application.

Chalk or cheap decals.

Added Comfort

Superior ergonomics, additional amenities include integrated arms and cupholders.

Armrest is clunky, additional small cupholders do not fit all drink containers.

Varying Seat Heights without Platforms

Yes with Customizable Spacing.

No, Platforms Required.

Egress + Access

Tip-Up Seat Design allows for wider egress pathways & superior access.

Folding chair creates smaller egress pathways. Most bottoms do not auto tip.
