

SLIM[™] PRODUCT IS PATENTED, DESIGNED, AND MANUFACTURED BY SERIES[®] SEATING, **DISTRIBUTED BY DREAMSEAT**[®]

INTELLIGENT DESIGN

The SLIM[™] product may be the smartest auditorium chair you have ever seen. Its sleek nonintrusive style incorporates both classic and contemporary influences compatible with any environment. The form and pattern of the chair is deliberately biomorphic. Like the human anatomy, the body of the chair has no straight lines, bringing both visual and tactile harmony between the chair and its user. The Ergo-web[™] foundation and Surround Foam[™] technology of SLIM[™] conform to the human anatomy in a way which blurs the line on where your body ends and the chair begins. On the efficiency side the Accordion System[™] design of SLIM[™] and its tight envelope achieves a seat capacity which is 20% greater than other fixed audience seats.

STREAMLINING

From Apple's "Air" products to Boeing's 787 Dreamliner, many of the iconic products we admire today share a common core appeal. In almost every case the excess bulk, found in out-of-date designs, has given way to the virtues of space efficiency and physical streamlining. Today's minimalism engineering inspires product innovation with a clean, uncluttered, and unadorned look and feel. The SLIM[™] achieves this with features that include our exclusive open-end design and an armless innovation which maximizes visual streamlining and personal space. In cases where there is a preference for arm dividers, SERIES[®] offers a crown shaped design which compliments the sleek contours in the chair seat and back. Arms are available in solid wood or molded polyurethane material with streamlined profiles.

Shown with upholstered Back Cover, Seat Cover, Aisle Panel UM20, and polyurethane arm

All back stitching types allow for easy slip-cover upholstery replacement in less than 8 minutes. Upholstered removable zippered seat slip-covers are easily replaced in less than 2 minutes.

SINGLE HORIZONTAL STITCHING & PLEAT

PATENTED SNAPPED IN REMOVABLE COVER WITH EMBROIDERED, DEBOSSED OR PRINTED LOGO

Matex™ is a pliable polyurethane reinforced with polyester mesh material created to add durability and flexibility to seat bottoms and outer backs. The product is quite durable, non-flammable, scratch and dent resistant, and won't allow gum to stick to its surface. Superior function over typical hard plastic seat pans an outer backs.

BACK HEIGHT OPTIONS

The SLIM[™] is available in four different back height options. The design maximizes appearance and comfort while retaining our streamlined trademark. The tallest option of 40" maintains a remarkably slim 15".

CHAIR WIDTH OPTIONS

The SLIMTM is available in chair widths ranging from 19" to 22" utilizing our patented Accordion SystemTM along with fixed size seats. Seat widths are measured from the center of one arm to the center of the next arm.

CUP HOLDER OPTIONS

The SERIES® Seating only utilizes steel for our drinkholder options to ensure long-term performance - with a number of different positions available depending on the specific seating location. They are on the rear of the seat, on the front of the standard near the floor, or mounted to the armrest. Whether you are looking for strategically placed cupholders or smaller communion cups, you know they are built with highest quality materials.

THINGS YOU CARE ABOUT

True **INNOVATION** is much more than the introduction of something new. If it does not meet a need or provide a benefit not being provided by others, it is not innovation. The following is a list of features that are much more than something new. All provide benefits and paybacks like no other auditorium seat product you will find.

ACCORDION SYSTEM

- Rows can be adjusted to any row length on site.
- Single back and seat widths for visual continuity.
- Guarantees perfect alignment of the row ends at the aisle.
- Seats and backs are totally interchangeable.
- Single size components for attic stock.

SURROUND FOAM[™]

- Foam fully surrounds inner seat and back structure to prevent fabric marks.
- The Ergo-flex seat webbing allows even weight distribution, reduces pressure points, and enhances blood flow achieving optimal healthy comfort.
- Surface to surface airflow in both the seat and back minimizes heat and moisture build up in the foam, prolonging foam life and integrity.

FULLY ENCLOSED AUTOMATIC GRAVITY SEAT LIFT-UP SYSTEM

- Extremely quiet seat lift system.
- The system does not require any lubricants or maintenance.
- Fully enclosed pivot and seat stops that will not permit finger or clothing entrapments.

SEAT & BACK WOOD & STEEL STRUCTURE

- Exceeds the most demanding durability tests.
- With heavy use over time, the seat and back components will maintain comfort, alignment and appearance.

REMOVABLE SEAT & BACK CUSHION COVERS

• Allows replacement of the zippered seat cover in 2 minutes.

SEAT & BACK DROP-IN ASSEMBLY

- Allows replacement of the seat component in 30 seconds.
- Allows replacement of the back component in 60 seconds.

FLEXIBILITY

Complete Range of Supports

- Floor supports: Flat floor and slopes up to 9°.
- Air floor Supports: Flat floors and slopes up to 9°.
- Riser Supports: Ranging from 6" riser to any required height.
- Pedestal: Flat floor and slopes up to 9°.
- Air pedestal: Flat floor and slopes up to 9°.
- Out-In removable system: 1 chair.
- Back pitch options: 15°, 12°, 9°

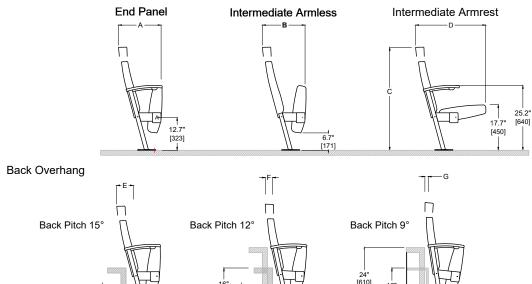

OPTIONS TO MEET YOUR NEEDS

SLIM KEY ATTRIBUTES

- Elegant Simple Design with compelling visual dynamics will remain current for a lifetime.
- Surround Foam Patented System adds to your comfort, prevents fabric marks, prevents foam deterioration and keeps a cool temperature for long lasting use. • Patented Seat & Back Tubular Steel & Mesh Construction maintains shape, increases durability and comfort to your seat and back. Backs have standard
- lumbar support. The seat construction will support up to 600 lbs. on the front edge of the seat and up to 1700 lbs. across the middle of the seat. • Patented Seat & Back Drop-in Assembly makes installation and service needs extremely simple while increasing efficiency thus saving time and money.
- Patented Fully Enclosed Silent Seat Gravity Lift System does not require any maintenance and will operate perfectly as long as there is gravity to help, insuring the seat will always return to a consistent position without finger or clothing entrapments. Available with 90 or 45 degrees stops.
- Removable Upholstered Cushion Covers allows for guick and easy change out.
- Patented Accordion System allows you to increase the width of seats up to 2 1/2" thus making installations simple on straight, radius or reverse radius row configurations, allowing perfect alignment of aisle panels and reducing amount of attic stock needed.
- · Series Seating manufactures in house all product components including foam, engineered wood, steel, and upholstery saving cost and improving quality control on all products.
