

# XPRESSION PRO

The Xpression PRO Gaming Chair builds upon our 1st generation Xpression Gaming Chair by introducing several additional features and enhancing some of the most popular elements. The Xpression PRO continues to provide exceptional body support and boasts an adjustable, contouring, durable, and fully reclining seat. With increased padding in the seat and back, the Xpression PRO is an ideal choice for gamers, streamers, dispatch workers, or anyone seeking extra comfort in an office chair. We've also incorporated a five-star metal base and included two magnetic pillows—one for lumbar support and another for the head and neck. Ofcourse, it wouldn't be a DreamSeat without the ability to proudly display an embroidered logo! The Xpression PRO sets new standards for quality, comfort, and stability, meeting and exceeding your expectations for a gaming or dispatch chair.
