

Gemini Max

The Gemini Max is the pinnacle of premium seating design incorporating years of spectator seating experience to provide the most advanced seat at the most cost effective price. The Gemini Max is a hybrid of a more advanced beam mount design mixed with the best aspects of traditional VIP spectator seating, with Gemini Max you get the best of both worlds. Designed with ergonomics in mind the Gemini Max is unrivaled in comfort while supplying the most leg room and widest egress pathways of any spectator seat in the market. Equipped with a higher and thicker padded back than the standard Gemini, the Gemini Max is truly a seat designed for the maximum luxury experience.

Gemini Temperature Controls

Your Choice of a Cooled or Heated Seat Bottom with a Dual Mode, HML Side Control

The Thermavance system uses conductive cooling and heating. It does not use circulated air to create the cooling/heating effect on the occupant's bottom.

The system does not require air movement through the cover which means it doesn't require perforations in the seat surface material. Therefore, because the seat cover is sealed, it is weather-friendly and spill-friendly.
