

Gemini

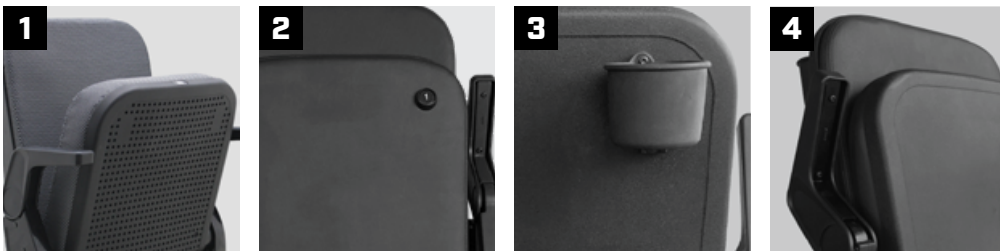

The Gemini is the most versatile spectator seating product in the DreamSeat line, available in a general admission version up to a VIP suite level there is a Gemini option for every application. The Gemini is a hybrid of a more advanced beam mount design mixed with the best aspects of traditional spectator seating, with Gemini you get the best of both worlds. Designed with ergonomics in mind the Gemini is unrivaled in comfort while supplying the most leg room and widest egress pathways of any spectator seat in the market. Available with too many customization options to count you can truly make the Gemini the perfect seat for your unique needs. Build out a club area or your entire venue, the options are endless.

Gemini Temperature Controls

Your Choice of a Cooled or Heated Seat Bottom with a Dual Mode, HML Side Control

The Thermavance system uses conductive cooling and heating. It does not use circulated air to create the cooling/heating effect on the occupant's bottom.

The system does not require air movement through the cover which means it doesn't require perforations in the seat surface material. Therefore, because the seat cover is sealed, it is weather-friendly and spill-friendly.
